EDUCATION

Loyola Marymount University

Los Angeles, CA

B.S. in Information Systems and Business Analytics

Expected Graduation May 2026

- Relevant Coursework: Programming for Business Applications, Database Management Systems, Developing Business Applications Using SQL, Systems Analysis & Design, Sports Economics
- Campus Involvement: ISBA Society, International Business Society, Club Baseball (Safety Officer)

Fordham University London

London, England

Gabelli School of Business Semester Abroad

August 2024 - December 2024

EXPERIENCE

Loyola Marymount University – Division 1 Baseball Program

Los Angeles, CA

Analytics Operations Coordinator

September 2023 – Present

- Lead and mentor a team of 5 analytics interns, managing workflows and deliverables across the program's inaugural student analytics department
- Synthesize complex data and video using SQL, Python, and R to deliver important post-event insights
- Built an automated data pipeline ingesting 10,000+ records into a SQL data warehouse with structured views and interactive dashboards, enabling forecasting and trend analysis
- Serve as primary liaison between analytics and non-technical stakeholders, translating statistical models and pricing-relevant metrics into actionable strategy recommendations for decision-makers
- Designed and maintained a dimensional data model (star schema) in Snowflake, integrating API and web-scraped sources via dbt to power opponent-strength and demand-factor analysis for ticketing and scheduling insights

Los Angeles Rams

Los Angeles, CA

Mentee, Digital Marketing Analytics

October 2025 – March 2026

- Analyzed digital campaign performance metrics and audience engagement data to evaluate marketing effectiveness and identify trends
- Analyzed customer segmentation and behavioral data to surface demand trends, informing campaign targeting and revenue optimization strategies

Training Camp Intern

July 2025 – August 2025

- Supported training camp operations and event execution for 20,000+ attendees in a fast-paced live-event environment
- Coordinated on-site logistics, staff communication, and real-time problem solving to maintain efficient operations and attendee flow

PROJECTS

NHL Opponent & Schedule Intelligence Tool — Ticket Pricing Analytics May 2026

- Built an end-to-end data pipeline integrating the SeatGeek API and web-scraped sources into a Snowflake data warehouse, transforming raw data through dbt staging and mart layers into a star schema optimized for demand and pricing analysis
- Developed an interactive Streamlit dashboard analyzing dynamic pricing factors — opponent strength, event timing, and team performance — to surface ticket pricing trends and revenue optimization opportunities across 170+ NHL events
- Automated extraction, transformation, and deployment using GitHub Actions CI/CD, demonstrating the full data science lifecycle from data ingestion through model design to production dashboarding

SKILLS

Analytics & Technical: Python (Pandas, NumPy), SQL, R, Snowflake, dbt, Data Visualization & Dashboarding (Looker, Power BI, Streamlit), GitHub, GitHub Actions (CI/CD)

Business Tools: Microsoft Excel (PivotTables, charts, data analysis), Microsoft Office, Google Workspace
